We now offer a variety of hunts across the province. Our Moose, Elk and Archery Mule deer hunts take place in the Grande Prairie area. Our bear hunts are North of Fort McMurray. While our Whitetail hunts take place south west of the Edmonton bow zone. It is a lot of work traveling around the province but by doing so we are hunting the very best areas for the species that we provide. In the Grande Prairie area our hunts are done from our lodge as well as some remote spike camps. In Fort McMurray our main camp is a mobile camp trailer as well as a spike camp consisting of portable plywood cabins. For our late October, November Whitetail hunts we stay at Pigeon Lake in summer cottages.

**Baited Black Bear Hunts:**

Our season begins each spring in Fort McMurray with baited bear hunts. We take 12 hunters in main camp and 12 in trophy spike camp. This area has been incredible for trophy potential and numbers of bears. Everyone gets a bear with about half the guys taking a second bear. I consider this area the best in the province for record book bears, due to the remoteness, lack of access and absence of resident hunters.

**Archery Mule Deer Hunts:**

Our first fall hunt is our early Sept archery mule deer in velvet hunt. On this hunt we will be hunting the newly famous Peace River area. Our main means of hunting is spot and stalk in grain fields while the bucks are in velvet in bachelor groups. We will have opportunities daily on 170 plus P & Y bucks. Our success rate has been very good with 100% opportunity. I personally was lucky enough to take the Alberta non- typical velvet record scoring 215 P & Y.

**Archery & Rifle Elk Hunts:**

Directly after our mule deer hunts we will be starting archery rut elk; followed by rifle rut elk hunts. These hunts take place from spike camps in the middle of heavily forested elk country. Bulls will be called in to close range for both hunts. This is a very exciting hunt with close range action. Elk population in these areas is increasing rapidly.

**Rut Moose Hunts:**

Our last hunt in the Grande Prairie area is our rut moose hunts, which can be done with bow, muzzleloader or rifle. This is also a close range hunt with bulls being called in heavy cover. Moose populations are at an all time high. We should have a number of bulls to look over. This is a very high success hunt.

**Whitetail Deer Hunts:**

Our final hunts of the year takes place outside of Edmonton with archery whitetail deer in late October and rifle Whitetail in November during the peak of the rut. This area has produced some of the top whitetails taken in the great province of Alberta. Due to the mild winters you will be seeing many more record book bucks taken from this area.

Our success on all hunts is due to being in the best areas the province has to offer and taking pride in our the entire hunting experience that we offer.
